HISTORY

2001

schimek ZT GmbH architecture+engineering
CEO and Principal Architect Olivia Schimek-Hickisch

1975 - 2000

Architectural office Helmut Schimek

Mrs Schimek-Hickisch **studied architecture in Vienna and Canada**, accompanied by numerous study-trips. She **practiced in Singapore and lived in London**.

She **continued the family's architectural office** after her late father and her field of activity covers a **diverse variety of projects** including private housing, adaptation and renovation, public buildings and general planning of large developments. She **lectures at national and international professional conventions**, acts as a trainer, thesis supervisor and juror in architectural competitions.

She follows an intense commitment in professional organisations: Her latest positions are president ÖIAV (regional society of architects and engineers) and **vice-president of the regional chamber of fully chartered architects and engineers**.

BIOCLIMATIC

BUILDING IN HARMONY.

Schimek architecture & engineering is specialised in working with natural materials and renewable energy from the very beginning. Accordingly Olivia Schimek-Hickisch was awarded the Austrian Solar Price in 2000. She shares her knowledge within her worldwide partner network and by lecturing and publishing internationally. "Our unique strength is implementing aesthetic future oriented holistic solutions."

CORPORATE ARCHITECTURE

GRABBING VISIONS.

A company's objective is determining the usage and performance of a building. Appropriately wide ranges the experience at schimek architecture+engineering. „We are always aiming for solutions on a high technical and conceptional level targeting more efficiency and performance – and displaying the entrepreneurial spirit and vision by the means of architectural expression and design.“

FLOOD PROTECTION OF BUILDINGS

SUSTAINABLY SECURING HABITAT.

schimek architecture+engineering has gained relevant experience for many years and stands for approved, integrated and sophisticated protection of buildings. "The secure foundation of our concepts for the architectural design, refurbishment or monument conservation consists of profound technical specialized know-how (e.g. also in the fields of civil engineering and geotechnics) to which we, on occasion, integrate our established network partners."

MOTORSPORTS

ADVENTURE ARCHITECTURE.

Racing tracks are an outstanding speciality of schimek architecture+engineering. Apart from the track planning, which is supervised by the internationally renowned track designer Dr. Franz Schreiner, a multifunctional infrastructure has to be created. Technical and visual ambitious solutions according to the high level standards of the FIA are fulfilled for grand stands, paddocks, racing towers etc.. All of this meeting highest quality in order to create a great experience for the whole family.
